DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with **Gregory J. Murgia** on November 01, 2004.

The application has been amended as follows:

IN THE CLAIM

- A. **Claim 1 cancelled.**

Allowable Subject Matter

2. Claims 2 and 4 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art fails to show a power supply comprising: means for combining the analog correction signal with the derived signal, wherein the means for deriving a digital signal representation and the means for converting the digital correction signal each have a resolution of at least 2^{12} steps; and wherein the means for connecting and the means for combining comprise resistive elements and wherein tolerances of the resistive elements and resolution of the means for deriving a digital representation and the

means for converting the digital correction signal are selected such that the voltage supplied to the load has a tolerance equal to or better than approximately $\pm 1\%$.

Therefore, claims 2 and 4 are presently allowed.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
